

Thank you for your interest in Certified Elephant Friendly™ Tea!

Program Overview

The Certified Elephant Friendly™ Tea program is a partnership between the Wildlife Friendly Enterprise Network (WFEN) and the University of Montana's Broader Impacts Group. The standards are based on state-of-the-field research by University of Montana and other Asian Elephant and tea sector experts in the Indian context. Certified Elephant Friendly™ Tea is sourced from plantations that meet best practices for the protection of elephant habitat and water resources, reducing human-elephant conflict and mortality, and reducing barriers to elephant movement thus taking important steps toward protecting elephants, people and the natural environment from these hazards.
